Here you go. Good luck! :)

Python - Option C (Travel Buddy)
(1) App is Deployed (except in Heroku)
(.5) Login with validations
(.5) Registration with validation
(.25) Logout
(.5) Dashboard page: Displays the logged user's created/joined travel plans
(.5) Dashboard page: Displays other users' travel plans that the logged user has not joined yet
(.5) Dashboard page: Ability to join other users' travel plans.
(.5) Dashboard: Once the logged user joins, the travel plan record should move to the Trip Schedule tables. The said plan will now be removed from Other Users' Travel plan table.
(.5) Travel Plan page: Display the plan information: planned by, destination, description, date from and to.
(.5) Travel Plan page: List of other users who joined that plan
(.25) Travel Plan page: List of other users joining the plan should not include the name of the user who created it.
(.5) Ability to add new travel plans with validations on entries. Error messages should be displayed
(.25) Add new travel plan: The plan should be future-dated
(.25) The newly added travel plan should appear on logged user's Trip schedule table.

—> Fixed on final version submitted
